

ABSTRACT OF THE DISCLOSURE

The invention provides an immediate-release
fenofibrate composition comprising (a) an inert
5 hydrosoluble carrier covered with at least one layer
containing fenofibrate in a micronized form having a size
less than 20 μm , a hydrophilic polymer and, optionally, a
surfactant, the polymer making up at least 20% by weight
of (a); and (b) optionally one or several outer phase(s)
10 or layer(s).

The invention also provides a method for preparing
said composition.
